BUILDING

TYPED 1ST SEPTEMBER 2008

Female I thought the building was fantastic when I first arrived.

Male The architecture is brilliant.

Female It's a very bright, very spacious place.

Male Favourite part of the building is the coffee area, it's brilliant for having informal chats with people and it's got great views out around the building.

Female I love the building and where it's situated in the grounds, the views from the offices are great.

Female The European Innovation Centre is quite a cool place, it's where we take our clients or where we have big presentations to deliver, we will go in there.

Male Best point about the building is the space that you've got.

You've got a range of different areas to be in from the office environment through to the meeting rooms.

Female

The building is very open plan which I think is great for communication with other staff.

Male

It's got a lovely feel to it and it allows a lot of light in and it's just a fantastic place to work.
